CAMPBELL AND COMMUNITY

VOL. 32' NO. 34 CAMPBELL, SANTA CLARACOUNTY, CALIFORNIA. FRIDAY, FEB. 22,

Reminiscences

Do you rmember Campbell's first store? It was a small country store owned by Chas. Willett, brother of Mrs. Chas. Sutter.

A picture of it was exhibited in C. B. Field's store window the past week. By the way, that store doesn't look much like the old "Farmer's Union" that served the community for many years, does it?.

Do you recall the days when the Campbell Hotel was the Rochdale store, and did you ever attend services in what is now the Sunday school room of the Methodist Church when it stood where the Alpha Apartments now are?

And books—you know they used to be housed in the Congregational Church, then in the little library building until we (the community) built our new one a few years ago.

Were you here in the days of the first school house, now the enlarged, remodeled, charming home of Mr. and Mrs. James Turner on Winchester Road?

Or—

Does your residence date back to the old two-story grammar school that occupied the southwest corner of the present school grounds? Much of its material is incorporated in the commodious home of L. S. Bersinger, on Johnson Avenue.

In those days the original high school building now almost lost in additions, shops and annexes, was pointed to with pride and the "assembly hall" housed a local gathering.

Perchance

You did not come until after the erection of the grammar school, now designated as the High School Annex? Remember how those who realized the needs labored in the cause and all but "fought, bled and died" to secure a building with an auditorium?

Possibly

You are among those who have come among us since we have had our wonderful new grammar school, architecturally designed for additions, part of which have been already made.

And will "old settlers" whose ranks we successively join year by year, be able to point with equal pride to the achievement of a high school building commensurate with our needs, and ask, "Oh, yes, and do you remember we built this school in 1929?

To wondering readers we would say that the booklet, "Historical Sketch of Campbell," that was presented at the afternoon and evening meetings on Old Settlers' Day, is the cause of your not having the Press at the usual time.

This booklet grew to unforseen proportions and with other work attendant to the day, kept the force at work all of Thursday night and all day Friday as well, so—

That's all.

Insurance At Lesser Rates Work Of Hyde

The property owners of Campbell are rejoicing in the saving which accrues from the reduction in fire insurance rates which went into effect the first of February and covers all specifically rated risks located within the Campbell fire district.

Immediately after the installation of the high pressure water tank by the Campbell Water Co., Ralph H. Hyde applied to the board of fire underwriters for a rerating of the entire town.

This was not done at that time, altho' the rates for the three canneries were reduced in August. Mr. Hyde then made application for the balance of the business district, with the result that some of the risks were reduced as much as 40 per cent.

The changes date from Feb. 1, but all policies written on or after Dec. 1, 1928, are entitled to a reduction as of date of change.

A corps of engineers of the board of fire underwriters made several very thoro' inspections of the town water works, including the pressure of the water in mains, volume of water, and pumping facilities and were very well pleased with conditions and it was owing to their report that the board made the cut.

The fine record which the volunteer fire company has made in keeping down local fire losses to a minimum made an excellent showing in the same report and helped materially in securing results.

Alumni Plan To Entertain Class Of '29

A preliminary meeting of Campbell high alumni was held in San Jose Monday evening to re-organize the Alumni association. Graham Peake was instrumental in calling the meeting and was selected as general chairman for the coming reunion set for May 18. David Strom and Helen Marshman were selected to act as secretary-treasurer and assistant.

It was decided that the first celebration be held here in May, when the graduating class will be honor guests at a social dance and card party.

The committee on arrangements named to assist Graham are: Irma Young Saunders, Helen Marshman, Bernice Bogert Heinzen, D. A. Yeager, Miss Claribel Boesch, Roy Bartholomew and Dave Strom.

All those present voiced a strong opinion in favor of a new high school that is so much neeeded here.

Graduates were registered at the Old Settlers' celebration by Mrs. Irma Saunders, Mrs. Vivian Kennedy and Mrs. Miriam Dunlap.

New School Talked At Meet

Special to The Campbell Press.

The campaign for a new high school building for the Campbell Union High School District was opened last Friday at the grammar school building in Campbell. About one hundred and fifty guests of the Parent Teachers Association were present.

The skirmish line was composed of pupils under the direction of Mrs. Howes, singing "The Old Grey School She Ain't What She Used To Be," followed by Clyde Sheuerman, senior; Virginia Tressler, junior, Tony Lovoi, sophomore, and Ethel Kirk of the baby class, telling why we need a new school building.

D. H. Cramer and Neil Best emphasized the effect of the old building on the discipline and character of the student body, and told how teaching was handicapped.

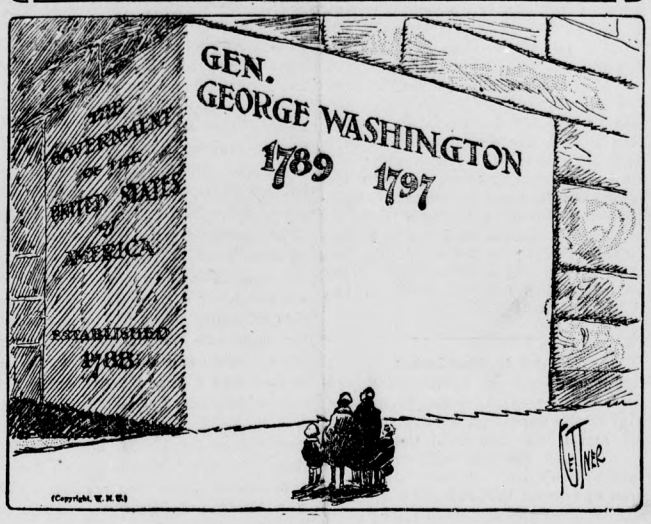

The big guns were then dragged into action and Mr. R. E. Stubbe, Dr. W. I. Merrill, Mrs. Merrill, Mrs. Zillmer, Major Shelton, Harry Barnes and S. N. Hedegard spoke of the need for a new school and the ability of the district to pay for one. Overwhelming evidence was given showing that the building has outlived its usefulness.

Our building was compared unfavorably with the high school buildings of our neighbors, and facts given to show that our assessed valuation, our ability to pay is as high as the richest of our neighbors.

Enthusiasm for a new building, immediately, ran high. A petition requesting the high school trustees to set a date for a bond election this spring was circulated and signed.

The Parent Teachers Associaion announced that all would be given an opportunity to sign this petition during the Old Settlers program at the Campbell grammar school this Friday.

The Corner Stone of Our Government

Festival Set For May 18

SAN JOSE, Feb. 22.—Saturday, May 18, has been decided upon as the date for the fourth annual Santa Clara county Fiesta de las Rosas, to be held in this city.

As in the past, this "festival of flowers" is to be featured by a grand floral parade of more than eighty floats of natural flowers and twenty-five of California's finest musical units. Viewed by 500,000 people last May it is expected that this spectacle of millions of flowers will attract an even larger throng to the state's first capital city.

In addition to the floral pageant will be the great rose show conducted by the numerous flower lover clubs of the county and a festival of music to be participated in by more than 1,000 high school students.

Mrs. George Midlock was hostess to tee members of the Pundito Circle Wednesday afternoon at her home on Weat Campbell avenue.

The progran was on the Pacific islands eepeciacially those under the American flag. Mrs. D. H Cramer described the gaography of the islands. Mrs. H. Thayson read some interesting letters from a nephew in the Hawaiian islands Several souveuils from the islands were exhibitdd and refreshments iocluded tropical fruits foune in the Pacific Islands.

Think It Over

He who knows only his own side of the case knows little of that.

Women's Club Hears Reports

Mrs. Ellen R. Smith of the library committee of the Country Woman's Club, reported Monday that a magazine rack was very badly needed in the library and that one could be built reasonably. The club voted to have one made and paid for out of their personal fund.

The request for a stand upon which to place the fern in the library room has not met with a response as yet, so it is being repeated in the hope that somebody may have one to spare.

The program for the afternoon was Short Stories, with Mrs. E. I. Price as chairman. She gave a few humorous comments in opening and then introduced Miss Helen Kalas, who, she said, would give her short stories in song.

These were a group of charming old English ballads, "Phillis Hath Such Charming Graces," "My Lovely Celia," and "Where the bee sucks there lurk I." Mrs. Robson was her accompanist.

Mrs. Price further commented on kinds of short stories and the classification of people as round and flat characters. She quoted briefly from "The Aspects of the Novel" by Foster. She then announced that they had decided to use short stories by local writers, as being a change from our usual custom.

Mrs. E. R. Kennedy read a unique story "John Jones, Grocer," written a few years ago by J. D. Blaine, while he was taking a Universiy extension course in short story writing. She also called attention to a magazine story, "An Immortal Impression," being a description of California, written by Rosena Giles, sister of Mrs. R. W. Kennedy.

A story in poetic form had been chosen by Miss A. E. Denton, who gave a comprehensive review, with a few readings of Robertson's, "Tristram."

Mrs. Mazarova George, an authoress of considerable note, who has published stories and novels in both Russian and English, read a beautiful little dramatic story of heis, "351 and 353."

Attention was called to a collection of children's books selected by Miss Beth Kennedy of the county library staff, showing the wonderful things now offered to the avid young readers.

It was an afternoon of great interest and pleasure, to which an artistic arrangement of early spring blossoms added beauty.

An announcement for the March 1st meeting was greeted with pleasant anticipation. Mrs. Katherine Gail Morrish will sing and Mrs. Fjorl Hess Watson will give a book review.

Lunchers Hear Lon Baker Talk On War Tues.

"War, the greatest problem that confronts the world today," was the interesting topic of the talk given by Lon Baker of Mountain View at the Tuesday luncheon. He chose the Kellogg peace pact as his theme and showed some of its weaknesses as well as strong points. He said in part:

Time was when the various parts of the world were quite separated and independent, but today it is a very small unit, only a few seconds from your farthest neighbor in point of communication. The fact is that we are all close neighbors and none independent of the others. Every nation is depending on other parts of the world for its material, raw or manufactured.

War breaks up this relationship. If we do not destroy war, it will destroy us. The Kellogg pact is an agreement whereby nations renounce war as a national policy and this is an entirely new idea in the world.

There are in the world today seven war producing germs, any one of which may produce war. They are:

1, Nationalism; 2, secret covenants, secretly arrived at; 3, economic rivalry; 4, subject minority; 5, imperialism; 6, militarism—preparation for war beyond requirements; 7, hatred, fear and revenge.

The ultimate solution of this great problem will only be reached when the public opinion of the nations demand immediate cessation of warlike gestures.

Russ Kennedy and Doc Beall, chairman and assisant, handed down some wise remarks and took good care of the visitors. Leonard Willis sang two baritone solos in his excellent voice.

With Carl Field, basketball referee, as chairman and Mark Purmort, husky turkey tumbler, assistant, Fred Saxon, the "Y" gymnast, will hold the crew spellbound by the strength of his argument next Tuesday noon. Weaklings better come early and avoid the crush.

Charity Lodge, No. 362, F. & A. M. held a special meeting Monday evening when the De Molay chapter of San Jose were present and initiated a group of six boys, three of them from Campbell, into the mysteries of their order. The officers were highly complimented on their initirtory work.

Light refreshments were served during the social hour when fun and jollity prevailed.

The Better Gift

As between being a good talker and a good listener, the latter is better. Good listeners are rare, and always popular.

"Pinafore" T... Be Presente... At Gram... Sch...

Sir Joseph came to pay his address to Josephine, the daughter of the captain of the Pinafore. He was followed by a retinue of lady relatives led by Hebe.

Josephine, however, is secretly in love with Raekstraw, and he is openly in love with her. He declares his love, but is rejected and in despondency attempts to his own life. Only by the admiss... Josephine that she also loves him ... tragedy averted.

Deadeye, homely and unlove... tells the captain of Josephine ... sraw's plan to elope, and as ... two lovers are captured ... thrown into irons.

Little Buttercup, a seller of ... secretly in love with the captain, ... ravels a mystery. When the cap... Raekstraw were babies in her char... had exchanged the two!

It immediately appeared that by a quic... turn of the wheel of fortune, the captain ... had become the common sailor, and th... sailor, captain of the vessel.

Raekstraw is brought up from the du... geon and presented to Josephine. Sir Jo... seph is consoled by Hebe. The former ... captain, reduced, now, to the rank of Bu... tercup, asks no more than happiness ... her. And so all ends most happily.

But to really appreciate the story ... must be seen in brilliant costume and hea... in thrilling song. This opportunity w... be presented on Saturday evening, Marc... 16, when the high school will render th... classic English operetta, in the gramm... school auditorium.

Lydia Moulton

Mrs. Lydia Moulton, for m... years a resident of Campbell, ... away on Wednesday even... ...ary 20, after an illness of fou... Lydia Dudley was born in Bat... York, in 1843. Of unusual ment... she graduated from Oberlin Col... ...ard later took a course in art in N... York city. Following this she ... came a teacher with marked succe... In the early seventies she came to Santa Clara county to visit her brother, Dr. Dudley, and remained here, securing a position as teacher in the College of the Pacific.

She was married in 1878 to Stillman A. Moulton, and in 1880 they purchased the ranch on Johnson Ave., which has since remained the family home.

Mrs. Moulton was an ardent church worker, a charter member of the Congregational Church, for which Mr. Moulton donated the ground upon which the building was erected. She was one kindly and charitable to all in need.

In recent years, on account of the infirmities of age, she has led a retired life, lovingly cared for by her daughter Lina at the family home on Johnson Ave.

Of the immediate family there remain three children, a son, Dudley residing in San Francisco, and daughters, Josephine and Lina.

Coronation of Monivong, King of Cambodia

This picture, made in Pnompenh, capital of Cambodia, shows the gorgeous procession at the coronation of Monivong, king of that country. The new monarch's father King Sisomath, died about a year ago, but the coronation of his successor took place only recently.

Englishmen Eat Much, but Few Put on Fat

The English are the leanest race in the world; one seldom sees a fat Englishman, yet many of them eat four square meals every day, writes William Lyon Phelps in Scribner's Magazine. And when you do see a fat Englishman you will find that he carries his weight remarkably well.

George Santayana told me a new story of the famous Oscar Browning, of King's college, Cambridge. He ate meals a day. There are persons wake up in the middle of the and cannot fall asleep again unless eaten something. But O. clock at three in the hat he might wake

k tea and vari- ght to his bed- was breakfast, ubstantial re- g till lunch, up for his meal came with plenty ng till din- aborate af- with a va- th and last which he ed. He lived

ange Offer Made Great Painter Gasp

W. P. Frith, royal academician, was painting in the country one summer, living in a cottage owned by a nice old woman who often used to watch him paint. There was a rush-bottomed chair which he used for his work and which he became quite attached. It wasn't worth more than 50 cents a lot of money in those days—and when he was leaving Frith offered dear old woman 5 shillings ($1.20) for it.

"But she said 'No,'" chuckled Frith, telling the incident to Julian Hawthorne, "she couldn't think of robbing me, but she'd be perfectly content if I'd take the chair in exchange for one of my little 'picters'!"

Which took Frith's breath away for a minute—the little 'picters' would easily sell for a thousand dollars or more—but he got out of it somehow and carried off the chair, too.—Kansas City Times.

Use a Fork Now

e is the generous lake of juice h vegetables used to be served. e the funny little fleets of es" that used to find harbor inner plates. Gone, there- necessity for the question, eat vegetables, shall we or a spoon?" For now- getables are usually served juice, and are served on the plate, either in combination (as table luncheon or dinner) or the meat. And then, of course, use the fork, or the knife and , if we have adopted the European of eating. We should always use s, too, for asparagus—not fingers, it really is too "drippy."—Mrs. ander King in Delineator.

Breaking It Gently

ere came a hurried knock at the and a voice made itself heard gh the letter box.

Open up, Mrs. O'Malley—open up!"

Mrs. O'Malley opened the door uickly. On the steps stood her eighbor, crying softly.

"Oi've come to tell ye yer 'usband met with an accident, Mrs. O'Mal- ," she wailed sadly.

"Ah, to be sure, an' phwat is ut w?" cried the other, anxiously.

"Och, the poor man was overcome the heat, darlin'."

"The heat?"

"Yis, yis," returned the bearer of news earnestly. "Your man fell the furnace o' the foundry."—Answers.

nces to certain en- he American marines reads—"If you don't killed." But this originate with the the American, Maga- ine: "It is really the things in nature. is to live, and to Almost daily, wild upon to make life- , and they usually rity and dispatch. laws go hand in e a law of nature reason."

Had One

A Broadway housewife was leaving the market house with two heavy baskets. She asked a little boy whether he would not carry one basket to the car, telling him she would give him a quarter. He fumbled about in his pocket, then blinded: "Ize already got one."

Industrial Beginning

The first wide looms installed for weaving wide cotton sheeting were set up at the Biddeford (Maine) plant of the Pepperell Manufacturing company in 1850.

Dare to Stand Alone

Wait not until you are backed by numbers. Wait not until you are sure of an echo from a crowd. The fewer the voices on the side of truth, the more distinct and strong must be your own.—Channing.

Power of Colors

Advertising men know a great deal about color psychology. Purple and royal blue lend an air of aristocracy to printed matter. That is why you often find expensive automobiles or high-priced securities presented to prospective buyers in elaborate circulars printed in these colors and in gold, which is also aristocratic. Red, the advertising men say, is a selling color. It has a tendency to excite the acquisitive instinct in men and women. Candies in red boxes sell best. Expensive perfumes sell marvelously in purple, gold and blue containers. A very red dress on a beautiful young woman will often bring the proposal that was withheld for months when more quiet colors were worn, these advertising experts, all men, tell us.—Capper's Weekly.

Bright Little Raymond

Raymond had just begun to go to school.

One morning his teacher was trying to impress upon her pupils the idea of self-reliance. It so happened that a certain small boy had been late on this particular morning. His excuse was that his mother had overslept, forgotten to call him, and breakfast was late. Hence the lecture on self-reliance.

"You have fathers and mothers to work for you now," concluded the teacher, "but what will you do after you're grown up? Who will work for you then?"

Raymond's hand shot up.

"Our wives, of course," he replied. —London Tid-Bits.

Diamonds in Commerce

Forty per cent of the world's output of diamonds is used for commercial purposes. Every automobile contains parts which have been turned by the use of diamonds. The vulcanite of the magneto is turned with a diamond.

Waste of Time

"When you tries to make a man change his mind," said Uncle Eben, "he's purty sure to staht in tryin' to make you change yours and you might as well call it a draw an' go back to work."—Washington Star.

Began With Stone Age

The Stone age derives its name from the fact that during that age man manufactured his tools and weapons chiefly of stone. These implements constitute the earliest known cultural traces of the human race.

Kicked Into Learning

Who would be at the trouble of learning, when he finds his ignorance is caressed? But when you browbeat and maul them you make them men; for, though they have no natural mettle, yet if they are spurred and kicked they will mend their pace.—Jeremy Collier.

Either One Can Do It

Two can always make a success of matrimony when they try but it takes only one to spill the beans.—Capper's Weekly.

Fiercer Than Shark

It is generally believed that the shark is the most dangerous, but the barracuda, a large savage pikelike fish of the tropical seas, is more apt to attack man than the shark. It is almost as large as a twelve-year-old boy and its mouth is such that any bite is likely to result in permanent injury.

Shakespeare in Japanese

A Tokyo professor has recently completed a translation of all of Shakespeare's writings, having spent 40 years upon the work, which is reported to be a brilliant achievement.

Savior on the Cross

The early crucifix, almost without exception, represent Christ as clothed with a tunic reaching to His feet. In the Eighth century the custom was modified.

Well to Remember

Our light must shine in freedom from care save for one another, in interest in the things of others, in fearlessness and tenderness, in courtesy and graciousness.—George MacDonald

Work on Their Own Hook

Women's independence from their husbands began when they quit wearing dresses with 24 buttons in the back.—Little Rock Arkansas Gazette

Passing Observation

Some of the months that go to make a year are about as disagreeable as some of the people who help make the world.—Cincinnati Enquirer.

Convenience for Sailors

Sailors wear bell-bottom trousers in order that they may be easily rolled up when scrubbing the decks or when wading in the water.

Tuskless Elephants

The males among elephants of India are frequently provided with tusks, but this is by no means universal and the finest physical development is reached in those males that have no tusks at all. These are known in Burma as hines and in India as mukna.

The tuskless males frequently dominate the tuskers, in which connection the Burma and Indian riders have it that a hine can defeat a tusker in a fight by passing the trunk under one of his adversary's tusks and over the other, and by applying pressure either throwing him or smashing a tusk.

There is, so far as I know, no reliable evidence in favor of this, but it is a fact that tuskless males often rule the herd.—A. W. Smith in the Atlantic Monthly

Clung to Parchment

Public documents were not allowed to be engrossed on so fragile a material as the earlier paper was found to be, and it was not until the art advanced that the new material superseded parchment. A careful inspection of several hundred old codices in the royal library at Berlin fails to disclose any lasting properties of the paper upon which they were written. On the contrary, the leaves are in many instances crumbling into brittle fragments, while the writing has become illegible.

Nevertheless, it should be added, the German paper has had a test of several centuries, while it is certain that some of the paper made today almost drops to pieces if one looks at it severely.

Not "St." Pattens

Among the many fine edifices erected by Christopher Wren is St. Margaret Pattens, Fenchurch street, London. It bears the date of 1687, and occupies the site of a church which was destroyed by fire.

The name of the saint to whom it is dedicated is not Pattens, as might conceivably be supposed, but just plain Margaret. The church owes its second name to a colony of pattern makers who formerly dwelt thereabouts.

St. Margaret was a young Christian convert of Antioch, in Pisidia, who was condemned to be swallowed alive by a dragon. But the cross she was wearing stuck fast in the creature's throat and choked it.

Out of Sight

Nine-year-old Joe had challenged his mother to a game of hide and seek at his grandmother's country cottage and, of course, mother was it. She counted up to a hundred by fives, shouted "Here I come!" in orthodox fashion and began hunting. She searched every nook and cranny and peered behind every tree and shrub but no boy, so at last she was forced to call "Home free!" When Joe appeared she was very curious to know where he had been hiding so successfully. "That was a cinch!" declared the youngster, "I just climbed up the windmill!"

Radio

"Have you heard the new, 1929 type of Philco all-electric receiving set?" asks P. H. Dunlap of the partnership of Dunlap & Smily of every radio enthusiast he meets.

"The new set," he continues, "has an electro-dynamic speaker, eight tubes including rectifier and push-pull amplification. This is saying a whole lot for a radio set, but it doesn't tell all the story of Philco's stunning performances.

"Tone is the big thing in a radio set. That's why the dynamic speaker has had such a popular favor. But it has had a serious shortcoming—overemphasis of the bass notes in music. This fault glared out when a symphony orchestra was on. The Philco laboratory has solved this problem and has perfected the dynamic speaker so that it brings out all the tones, high as well as low, in their true relation—with life-like clearness.

"This in itself is a big accomplishment, but the Philco has been improved along other lines. The push-pull amplification assures purity of tone, even when the instrument is turned on to a volume too loud for comfortable reception. There is more pep and power in it, greater distance range, sharper tuning. And this in the face of the remarkable qualities shown in the set when it first came out a few months ago. It then held a record in moderate-priced sets for distance-range, split-hair selectivity and fine tone. This has all been vastly improved on by Philco's latest set. And there is a new furniture model, too—an exquisite full-length console cabinet. This is a handsome addition to Philco's fine line of art cabinets.

"Super-power—that's the secret of Philco's neutrodyne-plus principle. It performs under the most difficult local conditions, goes over great disances—even in the daytime—and can pick up signals on fractions of the dial space. The Philco serves without an aerial for local and many distant stations.

"In this advanced sage of radio set improvement there are many good sets on the market, but I believe Philco is in a class apart."

Several real estate transfers were made in this community last week. D. L. Page, manager of Burnett Jewlery campany purchased the S. L. Hayes home on Rincon avenue; Carl Grunwald is the new owner of the 12½ acre Lorenzo property. He is a recent arrival from San Antonio and W. W. Sibley of Missouri has bonght the Paul Cook cottage on West Campbell avenue.

GEORGE WASHINGTON named six individuals to serve as executors of his will. Why? To make sure that *One* would survive him.

TODAY you can name as your executor and trustee an experienced, responsible, enduring trust organization like the American Trust Company - *whose life goes on from generation to generation.*

NOTICE OF TRUSTEE'S SALE
No. 420

WHEREAS, Thomas B. Hicks and Estelle L. Hicks, his wife, by deed of trust dated April 20, 1928, and recorded May 29, 1928, in Book 403 of Official Records of Santa Clara county, California, at page 316 et seq., did grant and convey that certain real property hereinafter described, to Carl C. Francis, as trustee, to secure, among other things, a promissory note in the aggregate sum of six thousand five hundred (6500.00) dollars, with interest thereon at the rate of 7 1/5 per cent per annum, payable monthly in favor of Charles Grandeman and Adele M. Grandeman, also to secure any other sums of money which might become due and payable under the terms of said deed of trust; and

Whereas, said note and deed of trust have been duly assigned to A. L. Hubbard and San Jose Abstract & Title Insurance Co., a corporation, has been duly substituted as trustee under said deed of trust in place and stead of Carl C. Francis; and

Whereas, default was made in the payments due upon said note and obligation, in that the following items were not paid when due, and still remain due, owing and unpaid:

Default in the payment of interest under terms of said note; and

Whereas, in accordance with the provisions of said note and deed of trust, and by reason of such default, the owner and holder of said note and obligations exercised the option given therein and did declare all sums secured thereby to be immediately due and payable, and did execute and deliver to the trustee a written declaration of default and demand for sale, and thereafter, in accordance with the provisions of Section 2924 of the Civil Code, did record a notice of default and breach in the conditions of said deed of trust, which said notice was recorded November 3, 1928, in Book 435 of official records of Santa Clara county, California, at page 223 et seq.; and

Whereas, said deed of trust provides that after three months shall have elapsed following such recordation of said notice, the trusee, without demand, shall sell said property as therein provided;

Now Therefore, notice is hereby given that by virtue of the authority vested under said deed of trust, said trustee will sell at public auction to the highest bidder for cash in lawful money of the United States, on Monday, the 18th day of March, 1929, at the hour of 2:05 o'clock P. M. at the front door of the County Court House in the city of San Jose, county of Santa Clara, State of California, the interest conveyed to said trustee by said deed of trust in and to the property therein described, situate in the county of Santa Clara, State of California, described as follows:

Commencing at a point in the center line of Johnson Avenue being the northeast corner of the tract of land conveyed by W. H. Gilmore to Mary E. Newhall by deed dated May 11, 1881 and of record in the office of the County Recorder of the county of Santa Clara, state of California, in Book 59 of Deeds, page 593 et seq., said point being also distant S. 12.84 chains from the intersection of said center line of Johnson Avenue with the center line of Campbell Avenue and running south along the center line of said Johnson Avenue seventy-five (75) feet; thence west five hundred fifty-seven and 25/100 (557.25) feet to a point; thence N. 3° 15' E. seventy-five and 12/100 (75.12) feet to a point; thence five hundred fifty-three (553) feet to the point of commencement and being part of Lot 12 as shown upon the map entitled "Map of the Subdivision of the Estate of A. Johnson" which said map is of record in the office of the County Recorder of the said county of Santa Clara, in Book "A" of Maps, page 37, containing 0.955 acres of land.

Or so much thereof as shall be necessary to pay all sums due and unpaid or to become due, secured by said deed of trust, subject, however, to any and all prior liens and encumbrances.

Dated February 20, 1929.

SAN JOSE ABSTRACT & TITLE INSURANCE CO., as Trustee
By L. P. Edwards,
Its President.

(Corporate Seal)

Mr. and Mrs. C. E. Hancock of San Francisco spent the week end with Mrs. Hancock's parents, Mr. and Mrs. C. F. Rubell.

Hugo Ehret is expected soon from Indiana for a month's visit with his parents-in-law, Mr. and Mrs. J. G. Relfe.

Madame R. W. Castor, who operated the Thrift shop in Campbell, has been associated for some weeks with the Sanitary Cleaners at 817 South First Street, where the Whitman cottage on N. Central to 88 she has now been promoted to the position of manager. The family has moved from So. Central.

Congregational Church Notes

Next Sunday at 11 a. m. Rev. J. H. Bennett's subject will be "Mary and the Cruse of Ointment," also a talk to the children. Choral music, Soloist: Mr. Earl Marsh of Milwaukee.

At 6:30 p. m. the young people will meet to discuss the subject of "Do we need the Church?"

At 7:30 p. m. there will be a lantern lecture on "Hawaii" by Rev. Rowlanc B. Dodge of Palo Alto. Collection to go towards mission. ary work.

Rev. Bennett is lecturing at Willow Glen at the Methodist Church on Sunday night at 7:30 p. m. Missionary work among the fishermen with slides and moving pictures.

Thursday Fed. 28, the Guild will meet at the home of Mrs. W. I. Merrill at 2 p. m. The meeiing will be a social affair and a program has been arranged.

The fortnightly fellowship supper will come on Thursday Feb. 28. The reservations are limited as sixty have been taken over by the I. O. O. F. for their members. All others must apply to Rev. Bennett as soon as possible. Mrs. W. R. Coupland is in charge of of the dinner arrangements. All are welcome to the talk on the European Situation at 7:30 by Rev. Bennett. The Cunard Steamship Co. are to supply four films on Europe in story form and Mr. J. F. Holmes will operate the machine. A collection will be taken towards the overhead expenses. If you cannot come to the dinner come to the talk and films.

Rev. J. H. Bennett is talking to the student body of the Theodore Roosevelt junior high on Feb. 27, and in the evening to the Sons and Daughters of St. George.

Hi P.T.A. Notes

The Campbell Union Hi P. T. A. held a very interesting meeting on Feb. 19. The membership chairman reported a growth to an enrollment of 42.

Mri. W. I. Merrill gave a report of the district meeting held on M nday of this week. She mentioned especially the large founder's day offertngs from the various clubs.

The P. T. A. will assist the Junior class of the school to keep open house and serve refreshments in the basement of the school on the afternoon of Old Settler,s Day.

The committee appointed to rouse enthusiasm for building a new high school was given much praise for its work.

The clnb will hold a card party soon after lent the date to be set later.

Mrs. S. N. Hedegard was elected as delegate and Mrs. R. E. Stubbe as alternate on the nominating committee of the Foothill Council.

The next meeting of the P. T. A. will be on the evening of March 19 in the form of a mass meeting in the study hall of the school. There will be a good speaker provided for this meeting.

Legislators' Emolument

The first salary decided upon for senators and representatives in congress was $6 a day for each day a member attended. The present salary of a member of congress is $10,000.

Explaining Abbreviations

"Mr." was originally the abbreviation of "master" in the Sixteenth and Seventeenth centuries in England. "Mister" is merely a rendering of the pronunciation of the abbreviation. It was used as the prefix for anyone below the rank of knight. "Mrs." is an abbreviation for "mistress," originally one who had care or authority over servants. "Miss' is derived from the same word.

NOTICE

Members of the New England Society and other New Englanders are informed that the next meeting and luncheon of the society will be on February 28, Thursday, in the Chrisiant Church, 75 Souh Fifth street, San Jose, at noon. Luncheon 12:15. Program immediately after. All are invited.

ANNIE L. FAIRFIELD,
Secretary.

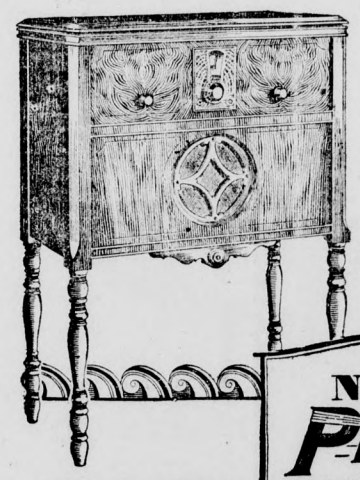

A Dollar Dinner For Four

THE cost of the keener appetites for fall can be offset by the careful housewife who does her marketing with discrimination. Here is a dollar dinner for four which will not only satisfy, but please. The prices quoted can be obtained from most of the cheaper stores throughout the country.

Vegetable Soup *Rolls*
Salmon Steak with Creamed Sauce
Baked Potatoes
Jellied Fruit Salad with Mayonnaise
Cookies *Coffee*

In the menu above vegetable soup makes a green vegetable unnecessary. The fruit salad, with cookies, serves both as salad and dessert. As to prices, a can of vegetable soup costs 10 cents, eight rolls cost 10 cents, a small can of evaporated milk for the creamed sauce costs 6 cents, potatoes, 5 cents, a can of pink salmon costs 17 cents, one-half can fruits for salad costs 15 cents, one tablespoon gelatin, 5 cents, mayonnaise, 4 cents, sufficient lettuce, 4 cents, cookies, 5 cents, and coffee, 5 cents. This totals 86 cents, leaving 14 cents for butter and incidentals.

Jellied Fruit Salad: Drain one can of fruits for salad, and use hali of the syrup and half of the fruit for this recipe. (Reserve the remainder of the fruit and syrup for fruit cup the following day). Soak one tablespoon gelatin in one-eighth cup cold water ior five minutes. To syrup from the fruit add enough water to make three-fourths cup. Heat to boiling and dissolve the gelatin in it. Add one tablespoon lemon juice and allow to cool. When just ready to stiffen, add one-fourth cup mayonnaise and the fruit which has been left in whole pieces. Mold and chill. When ready to serve, unmold and garnish with lettuce. Serves four.

New Philco Console

A FULL-length Louis XVI cabinet of high-grade construction and elegant finish. Matched walnut panels. Contains the 8-tube (including rectifier) Philco Receiver; power supply; built-in aerial and New Type Electro-Dynamic Speaker.

New Model PHILCO
REG. U.S. PAT. OFF.
ALL-ELECTRIC RADIO

The Philco "Neutrodyne-Plus" Radio, famous for vast distance range, split-hair selectivity and superb tone—NOW *greater than ever!*

with NEW TYPE Electro-Dynamic Speaker

At last, a Dynamic Speaker that gives you the high notes as well as the pleasing lows. No unnatural rumbling; no blurred tones. *Speech clear and distinct.* And tremendous volume without distortion.

Claim Uncanny Power Absorbed From Trees

In Liberia and Sierra Leone, in northern Africa, there is a small element of the residents who devote themselves to a rather uncanny life in the forest and so devotedly that they become part of the forest, entering into its moods as much as the very trees themselves. In fact, they claim to consort with the trees. By watching them and studying them and by constant association with one particular tree, they claim that there is an interchange of thought and sympathy through which these persons are enabled to ascertain information often of a very advanced nature. A few years ago it is recorded that one of these persons visited an American representing some industrial interests and told him of the sale of a great tract of land in the vicinity and gave him the name of the man who would come to take charge. Just out of curiosity a note was made of the name and the memorandum was properly witnessed, and four months later the prediction turned out to be absolutely correct in every particular. The forest lore is handed down to relatives.

Cloth Once "Printed" by Laborious Process

Cloth was printed before the bookprinting press was invented. It was a laborious process. The design for calico cloth was outlined on the surface of a wooden block, the outlines were bounded by pieces of brass or copper, and the surface filled in with felt to hold the color, and sometimes designs of as many as three or four colors were printed by this method. When the block was completed it was dipped in a color box, and the pattern was then impressed upon the fabric by stamping by hand, and for each color to be printed the cloth had to to be stamped by a separate operation.

It would take a man and one or two helpers a whole year to print as many yards of cloth as can be printed on a modern printing machine in probably a day or a little more.

Paper Old and New

Modern paper receives its share of criticism, perhaps not unjustly. It is asserted that present-day paper is perishable and that books printed upon it will not last, and comparisons unfavorable to the paper of today are drawn between the old-fashioned article and the new.

Much that has been said on this subject is undoubtedly true, but the inference must not be drawn that all old paper was lasting. The investigations go to show that the paper of past days was often very poor stuff. The history of paper making in Europe from the time of its introduction into Spain by the Moors in the Eleventh century shows that from its earliest use paper was deemed fit only for passing documents and that when it was first used in bound books it was thought necessary to bind alternate leaves of parchment and paper, as paper was deemed too brittle to stand the strain.

"Street of All Nations"

One of the most interesting streets in Great Britain is Bute street, Cardiff, Wales. In walking from one end to the other one may meet as many as 25 different nationalities, including Burmese, Swedes and Germans. One who visits Bute street will also find that it has more than 80 cafes and in one section ten of them are adjoining. The nationality of the proprietors is illustrated by signs on the windows, such as "Oslo Cafe," "Canadian Cafe," or "Cafe Paris." During the day these places are usually closed, but at night they are in full swing, the clients being the sailors that have just been paid off at the docks.

Struck Whales "Drown"

As a general thing the whale when struck by the whaler's harpoon dives below the surface and soon reappears for air to be greeted with another harpoon or two which puts him out of business. Occasionally they do not reappear and the explanation made is that they are drowned. Having received their death blow they reach the bottom, but have not the strength to return and their lungs filling with water makes it all the more difficult, as they are deprived of the buoyancy that this quantity of air would impart to their bodies.

Pity the Poor Dog

Gramophone needles and other painful things are often found in dogs' paws, according to a notice issued by the British National Canine Defense league. A dog had been limping for some weeks without any visible cause. A searching examination revealed the presence in his paw of a wild oat completely hidden under the skin. On removal the oat was found to have germinated in the dog's paw, showing a distinctly healthy green shoot.

Brilliant Idea

An elderly woman was taken to see basket ball match in which her son was playing. After watching for a few moments she inquired:

"What is the—er—object of this game?"

"Why," said the guide, "the object is to put the ball in that net."

"Oh," said the woman, with one of those rare flashes of genius, "it would be much simpler if they would get out of each other's way."

Health Secrets

More and more we are learning to rely upon nature, rather than upon medicines, for health. If we all followed nature's laws, most of our serious diseases would disappear. Certainly the so-called "diseases of civilization"—affections of the heart and nervous system—would be abolished. Sunlight, fresh air, exercise, right food, avoidance of worry, and the prompt repair of any injury or defect—these are practically all anyone needs to maintain perfect health.—Dr. Fred H. Albee in the American Magazine.

Tallow Trees

In Texas from time to time experiments have been made to cultivate the Japanese tallow tree. This tree bears nuts that contain a rich tallow-like oil that has been found very valuable in the manufacture of high-grade varnishes and other much-needed products.

The climatic and soil conditions in that section of Texas are apparently well adapted to the growth of this curious tree, and the experimental gardens have been supplying farmers through that region with young trees with which to experiment.

No Kidding

Mary Katherine, a golden-haired miss of three, is very fond of a neighbor, Mr. D—. She always expects some attention when he is at home and she is seldom disappointed. But one day Mr. D— sat on his porch, apparently absorbed in his own affairs, and did not see the little girl who was patiently waiting on her own porch for him to speak to her. When she could keep quiet no longer she called out, "Mr. D—, quit joking me!"

First Hint to Parents

Turn the child's face eastward, cries one of our great advocates of self-expression, but we've seen some mighty good results come from turning his seat upward occasionally.—Ohio State Journal.

Wise Professor

It was an English college professor who said the right use of our leisure hours is a more difficult problem than the right use of our working hours.—Atchison Globe.

Idea of Modern Ship Traced to Egyptians

Shipbuilding had its birth on the banks of the Nile, according to the belief of Prof. Elliott Smith, expressed in the London Magazine.

Although, he says, at a very early period in the history of mankind logs and floats of various kinds were used by many people to cross narrow sheets of water or for paddling along coastlines, the real history of boat building began when the earliest dwellers on the banks of the Nile tied together bundles of reeds to make floats.

These simple craft not only determined the form of the wooden ships that succeeded them, but the methods of construction for making the reed floats, i. e., tying them together with cords, were also adopted when wooden ships came to be built by adding planks to the hollowed-out logs which eventually degenerated into the mere keel of the composite ship. Thus the earliest Egyptian term for shipbuilding was the word signifying "to bind." Even at the present time we still find upon the Nile all these primitive types that are survivals of phases in the history of shipbuilding, some of them more than sixty centuries old.

Annual Victory Over the Powers of Evil

Great crowds assembled at Innerleithen, Peebleshire, Scotland, on a recent Saturday to witness the annual ceremony of "the cleikum," referred to in Sir Walter Scott's "St. Ronan's Well." The origin of the ceremony, says the Washington Star, is based on the legendary story of a combat with the devil engaged in by St. Ronan, Interleithen's patron saint, who died in 737. The patron saint was represented by the head boy of the public school, who was duly installed and armed with a monk's pastoral staff to "check the devil." Having "checked" him, he saw that the effigy of his satanic majesty was duly destroyed by fire. The ceremony was impressive, and the youth's victory over the devil was roundly cheered by the throng of students.

How About Pianos?

A thief stole a bass drum from an Akron musician. If you have any elephants around the house, keep your eye on them.—Akron Beacon Journal.

Way of a Truckman With a Modern Maid

As the truck came to a sudden stop a natty little roadster behind it, in spite of a violent application of brakes, ended with its front bumper giving the rear end of the truck ever so slight a jolt.

"Well, blankety-blank, blank it! Don'tcha know how to drive, ya so-and-so? What's the big idea, huh?"

I put my hands over my ears, but it did no good.

"Who in the this-and-that gave you a license, ya something-or-other? For 2 cents I'd—"

What crass vulgarity, I thought, now slightly irritated. Is it any wonder that such people stay in the same old rut? Imagine one of my profession using profanity like that!

"x—xx***!—!"—still the din kept up. Finally I lost what scant patience I retained.

"Miss," I said with as much dignity as I could muster, "I'm sorry I had to stop so suddenly, but I had no desire to run over that three-year-old youngster who dashed across the street. Now, go along to your tea or bridge party—your car isn't damaged, and as I said before, I'm very, very sorry."

And with that I climbed into my truck and drove away.—Kansas City Star.

Much Interest in Moon

Although total eclipses of the moon are far more generally observed than total eclipses of the sun, since they may be seen from more than half of the earth's surface while a total eclipse of the sun, according to the American Nature association, is visible only within a very narrow path of great length, yet they are not of so common occurrence that they pass unobserved or fail to arouse popular interest.

Mishap Gave Rhubarb Grower Valuable Idea

Jacob Schwartz, a farmer living on the outskirts of Detroit about 54 years ago, was hauling a load of fertilizer when the wretched road finally got such a tenacious grip on the wagon wheels that he was forced to unload the cargo. In so doing he covered some rhubarb plants nearby. After the roads had dried out the next spring he retrieved the fertilizer, and was surprised to discover that the rhubarb, kept warm by the decaying organic matter, had been growing all winter. The stalks were not red, streaked with green, but almost pure red in color, and instead of a large leaf at the top there was a little leaf of creamy yellow. The stalks looked so attractive that he persuaded his wife to try them in some pies. So delicious was the result that he built a box over his rhubarb plants, covered it up warmly and found the stalks grew quite long. Now, as everybody knows, winter growing of rhubarb is an industry.—Detroit News.

Underwater Terrors

The average weight of the American submarines ranges from 600 to 900 tons. The thickness of the sides is from one-quarter of an inch to one-half an inch, depending upon the type of submarine.
